📍 Bandung

🔗 Portfolio

👤 Profile

AI Engineer with strong academic grounding at Binus University and 1.5+ years of hands-on experience in building practical ML and DL solutions. Skilled in developing end-to-end models, including a symptom-based stroke risk prediction system using ML/DL, where the **CatBoost** model **achieving perfect accuracy** and leading performance metrics. Authored and submitted a comparative research paper on ML vs. DL stroke risk prediction to the **ICEEIE conference**, supported by comprehensive experimentation and analysis.

🏠 Organizations

HIMTI and Google Developer Groups

09/2023 – Present

Member

Bandung

- Develop technological knowledge by regularly participating in various HIMTI and Google Developer Groups webinars, thereby expanding current knowledge in the field of software development and the digital industry.

Binusian Gaming

11/2023 – 09/2025

Activist

Bandung

- Initiating and executing 10+ Binusian Gaming events by increasing participant engagement to dozens of students through structured event management and cross-division collaboration.

Binus University

09/2023 – Present

Student

Bandung

- Design and build 10+ computer-based projects that improve programming and problem-solving skills through the implementation of modern technology and a systematic development approach.

🎓 Education

Computer Science

09/2023 – Present

Binus University

Bandung

GPA: 3.45/4.00 (82 Credits)

🏆 Skills

Machine Learning

scikit-learn, numpy, pandas

Deep Learning

tensorflow, keras, pytorch

Web Development

react, node.js, flask
